

**Two Town Hall meetings of 1 day**, one in the US and one in Europe, will be organized to present, discuss and collect feedback from the astronomical and neutrino communities about the policy for Open Alert Era, possible MoUs, joint scientific projects.

Europe: Cascina, EGO site

USA: Boston, Atlanta

Period: **March/April**

Possible options:

Boston or Atlanta (16-17 March or 29-30 March)

Cascina (March 12-17, 27-30 and April 11-13)

Doodle to maximize participation

The GCNs of the triggers sent in O2 will be public release with the O2 BBH catalog paper (rerun searches over O1-O2, final calibrated  $h(t)$ , denoised  $h(t)$ )

→ Not before April/May

LVC EM follow-up team is writing an O2 LVC paper which:

- Describes the entire O2 low-latency alert generation/vetting/distribution of alerts
- Gives an overview of gravitational wave information sent to partners and how the information support the EM/neutrino searches (to be submitted at the same time of catalog paper)
